THE PROPER CARE OF YOUR AUTOMOBILE Care of the Finish

ALL automobile finishes become dull and faded when they are exposed to the weather for a few months. The ultra-violet rays of the sun gradually disintegrate the film-forming ingredients in the finish, causing the loosening of tiny particles of pigment. Commonly called chalking or weathering, this results in the roughening of the originally smooth and glossy finish. These tiny particles of pigment, together with an accumulation of dust and dirt gather on the surface of the car, forming a thin hard coating which we call "traffic film."

Next: "Selecting The Right Polish"

It is a mistake to believe, however, that when this film has formed over the finish causing it to appear dull and faded, that the only thing that will bring it back is re-finishing. Of course, if the weathering has been permitted to progress, until it has penetrated through to the undercoat, re-finishing is necessary, but just as long as there is a layer of the original finish on the car, it can be restored by polishing. Most cars just need the removal of the "traffic film" and the application of a correctly formulated polish, to renew the lustre of the finish.

1. WHAT IT IS

THERE is only one essential difference between Skeet shooting and real bird shooting: Skeet birds have no feathers. Otherwise, they provide the same thrills and exhilarations, their flight is swift, varied and unexpected—in other words, true to natural conditions.

As a matter of fact, Skeet is a modern development of the old trap shooting game, but what an improvement! There is no limit to the variety of shots offered, for the angle at which the target is thrown, and the speed at which it travels, may both be altered to suit the shooters who are waiting to blaze away at them. Straightaways, slowly climbing up for the novices, can be changed in a moment into whizzing "outdrops" that dive and duck and would tax the skill of the most experienced hunter. "Incomers" may be sent to the guns that rival the speed of the real duck in full flight.

Skeet—it is an old Scandinavian word meaning "shoot"—instantly appeals to everyone, as it is generally conceded to be by far the nearest to field conditions of any form of clay-bird shooting. Men and women who never go into the field play it regularly and find it a game entirely sufficient unto itself. Experienced upland trap shooters, novices of all degrees, young and old, flock to the familiar stances to show their skill. Besides, it is invaluable from the point of view both of novices and old hands. It is a safe and effective way to train youngsters to shoot straight, and it keeps the hands and eyes of older sportsmen in training during

the off-seasons. For Skeet is essentially a year-round sport.

Once shot, Skeet is always followed through. It has been called "a highly exaggerating form of clay-bird shooting." The truth is, it is one of those games that is not only somewhat exaggerating, but also arouses a determination in all who play it to conquer it and learn to shoot it well. Psychologists tell us that there is no sport in the world quite as valuable as good shooting. It is not without significance that the term "straight-shooter" has come to mean a man who can be trusted in all things.

Anyone can shoot Skeet, but, of course, weeks and months of regular shooting must be done before anyone can shoot Skeet well. Luckily, the expense of equipping a field—a couple of vacant lots will provide ample room—is very low, and any gun, the favorite gun, will do. Indeed, there is a necessity for accurate pointing in Skeet, and any gun that the sportsman shoots well in this game will certainly prove ideal for any form of upland game shooting. It has been said, "The gun proven right for Skeet is the ideal field gun—but Skeet is the test."

Skeet is becoming extremely popular in Canada. It has already made its mark in the United States, where there are today something like six hundred organized clubs, not to mention many traps installed on private estates. Business men find in it a sure tonic for roughened nerves, and many for whom golf has no particular appeal are proving fanatical over Skeet. Indeed, it is an ideal game for the whole family.

This is No. 1 of a series of 12 articles on Skeet Shooting. Cut it out. When all have been clipped, you will have a complete write-up of this sportsman's sport which is rapidly becoming the rage across Canada.

Corp. Bone Leaves Stony.

Corporal G. R. Bone, who has been in charge of Stony Plain Detachment, R.C.M.P., for the past four years, has been promoted. His new duties lie in Calgary, where he will have charge of the Detachment there, and also in the surrounding districts. Since his arrival here in June, 1930, he has proved himself an efficient and popular officer, and his friends, while pleased to hear of his promotion, regret his departure from Stony Plain. Officer Bone carries with him to his new position at Calgary the best wishes of all in town and district who have come in contact with him during his stay.

Corporal Bone's relieving officer is Constable Lewis, from Headquarters Staff, in Edmonton, who has had experience on the Force and is well spoken of by his comrades.

"When Ladies Meet."

Mr Goodman's attraction at Kelly's Hall tonight the 13th is to be "When Ladies Meet," with Ann Harding and Robert Montgomery in the leading roles. These two are well known stars and are sure to give a pleasing performance. With these Myrna Loy, Alice Brady and Frank Morgan will be seen.

Kelly's Hall was filled to the limit on Thursday night, when "I Was A Spy" was shown. The audience took especial interest in this great war film, with its many startling situations. Mr Goodman is to be congratulated on bringing to Stony films of such high character.

The Comic film "The Great Open Spaces" was up to the average, with plenty of mirth provoking situations.

Presentation to Mrs. Bone.

On Friday evening last Mrs G R Bone was the honored guest of the ladies of the town who had met at the home of Mrs R A Walton, to bid her farewell, on the eve of her departure from Stony Plain. The lady was the recipient of a handsome dish, as a token of the esteem in which she is held. The donee made a brief, suitable reply.

The New Hall.

Good progress is being made on the construction of the new wing to Kelly's Hall—the work being done by Contractor Adam Mohr and his staff of carpenters. This work has been rushed, so as to have the new addition in readiness for the dance tomorrow night the 14th, when the officers and members of Stony Plain Lawn Tennis Club and their guests will engage in dancing. Barth's Orchestra is to provide the music.

To Inquire Into Taxation.

The matter of taxation having been under discussion at the last session of the Legislature, a Board was appointed to inquire into this subject, both Provincial and Municipal. Public sittings of this Board will be held at Central points in the Province on dates to be announced.

It is requested that those desirous of making representations before the Board should advise the secretary of the Board on or before Sep. 15.

Uniform Price System Advocated

Introduction of a uniform price system throughout Canada as a means of distributing whatever benefits result from protective tariffs and of equalizing production costs, was advocated by J. D. McKenna, St. John, N.B. publisher, in a recent submission to the royal commission investigating Nova Scotia's economic situation.

Urging equalization of wholesale prices of all protected goods manufactured in this country, Mr. McKenna contended that Montreal and Toronto virtually monopolized whatever benefits resulted from protective tariffs. Eighty-five per cent. of manufactured goods came out of Ontario and Quebec, he said, and because costs of the finished articles included all the taxes imposed by governments, provincial and federal, it followed that people of other provinces purchasing those goods, had to "pay not only their own taxes but theirs as well—and that comes to a pile of money."

His scheme to equalize costs and to standardize prices throughout the country, involves absorption by manufacturers of freight charges, a process with which many in Western Canada would be prone to agree. This, Mr. McKenna claimed, would permit manufacturers to place their products on the market at a uniform price—the same in Halifax, Regina and Vancouver as in Toronto and Montreal. Press despatches note that at the close of his presentation, Mr. McKenna was complimented by Prof. John Harry Jones of Leeds University, England, who, noted as an economist, is chairman of the commission.

The contentions and proposals of Mr. McKenna are by no means new to Western Canada. Least of all are they new to a certain small group of Saskatchewan economic students which, for two years or more, has quietly been conducting inquiries along similar lines, with a view eventually of sponsoring a plan which might be adopted as a "Western Policy." This group has concentrated its attention upon the price structure, seeking to determine what inequities exist with it, noting more particularly the effects upon it and upon the purchasing power of the prairie provinces of freight, tariff and taxation costs.

The former favorable disparity in wage and salary scales as between Western and Eastern Canada having disappeared under stress of economic conditions, or being noticeable only in reverse, the Saskatchewan group has been seeking something to compensate the loss. Though prices of manufactured goods had fallen, the drop was commensurate with the drop in prices of farm products, and seemed to be determined largely by the reduced purchasing power of consumers, in the West. Somewhere within this price structure, it was felt, lay certain factors which, if equalized or removed, would effect much-needed adjustments. Hence came the attack upon prices.

The Saskatchewan group has laid stress on the fact that, while freights and tariffs have increased farmers' production costs, they have received no compensation from manufacturers of consumers' goods, nor have the advantages accruing to the industrialized areas been distributed as it was thought, they should be. From this it was argued that, as consumers, prairie farmers were encouraging a system which tended to centralize industry in the Toronto and Montreal areas, which areas derived direct benefits from local taxes payable by the industries and from circulation of the payrolls of such industries. This system, it was contended, placed the West under toll both at home and in the East.

It was felt, therefore, that, inasmuch as these advantages were accorded the manufacturing areas of the East, there should be some compensatory factor, some method of distributing benefits, to all parts of Canada in the price structure. That is to say, while goods might cost a little more in the area of their manufacture, they would cost a little less in the area of their consumption. And inasmuch as the principle already is applied in the case of nationally-produced products, the proposition at first sight appears fair and just. The West will watch eastern reactions to the proposal made by Mr. McKenna, with considerable interest.

Not Very Profitable

Abraham Lincoln Made Very Little From Law Practice

When Abraham Lincoln was elected president of the United States, his bank balance aggregated \$60,144. The original ledger showing his account now is on display in the Springfield Marine bank at Springfield, Illinois, where Lincoln was a depositor from March 1, 1853, until his death. His account after his death was continued by his administrator, Judge David Davis, of Bloomington, Ill., being finally closed on May 22, 1867.

The ledger in which his account appears is displayed in a glass and wrought-iron show case. The ledger is turned to a page on which is written in fine script the name "A. Lincoln" and the entries on the page bear out the certainty that his income from the practice of law was meagre at times.

Few People Escape Attacks Of Summer Complaint

Summer Complaint may be slight, or it may be serious, but you can't tell when it seizes you how it may end. Allow the profuse diarrhoea, the vomiting and purging to continue, for a day or two, and you may become weak and prostrated.

Don't experiment. Get "Dr. Fowler's". It has been on the market for 88 years.

WORLD HAPPENINGS BRIEFLY TOLD

The French plane Arc-En-Ciel arrived at Natal, Brazil, after successfully flying the south Atlantic from Dakar, French West Africa.

Dr. Carl Olaf Jensen, one of the world's most eminent cancer research workers, died recently at Copenhagen of apoplexy.

A new attendance record was recorded at the Canadian National Exhibition with 265,000 persons entering the grounds on Labor Day.

The "Ontario Bulletin," official publication of the Ontario government offices in London, England, has ceased publication as the result of the government's action to abolish the offices.

The British Columbia board of industrial relations is considering minimum wage regulations for male office workers Adam Bell, chairman of the board and deputy minister of labor, announced.

The U.S. farm administration reported that up to August 31 it had purchased 4,250,000 cattle in more than a score of drought states, for which part payment of \$38,811,870 already has gone to nearly 250,000 farmers.

Returned from a five-week tour of the northwest, Stan Johnson, western district manager for Booth Fisheries Canadian Co., Ltd., said that the fish catch in the northern prairie provinces has been "enormous" this summer.

A delegation of the Japan Prohibition League visited Premier Katsuki Okada and urged that the sake-loving official give up the use of alcohol. The general, listened long enough to ascertain the object of his visitors and then turned away without answering.

George Batho, of the Manitoba department of agriculture, announced the finding of a new weed plague in Manitoba. Field bindweed, he said, had been located near Winkler, in the southern part of the province. He said it was the first time the weed has been encountered in Manitoba.

COULD NOT SEW A BUTTON ON

Her Hands Were Helpless With Rheumatism

At one time she thought she would lose the use of her right hand. But "a blessing"—in the form of Kruschen salts—put her right again. "I was sure in a bad state," she writes. "In fact, I could not do my housework. I was so bad with rheumatism in my arms and hands, I could not sleep at night, and I thought I would lose the use of my right hand. I could not hold anything, nor could I sew a button on. My arm was so stiff, I was advised to try Kruschen, and inside of three weeks I found such a change. I have kept on taking it, and now I sleep all night—thanks to Kruschen's help and relief."—(Mrs. J. H.)

Two of the ingredients of Kruschen Salts have the power of dissolving uric acid crystals, which are responsible for rheumatic agony. Other ingredients of these salts assist Nature to expel these dissolved crystals through the natural channel.

Wheat Situation Hopeful

Supply For 1934-35 More Closely Related To Probable Demand

The crop year 1934-35 is commencing with the general wheat situation not without its hopeful aspects, the Dominion bureau of statistics states.

The supply of wheat available for the present cereal year has been greatly reduced by virtue of a second successive crop disaster in the United States, the reduction of a low yield in Canada, a sharp decrease in production in many European countries and the prospects of a small crop in Australia. These developments combine to produce a situation where the available supply of wheat is more closely related to probable demand than at any time in recent years, the bureau said.

According to the United States department of agriculture, production of corn, wheat, oats, barley, rye and flaxseed are expected to be the smallest in 30 years.

Border Cuts Off Hospital

Free State Board Has To Cross Line To Inspect It

Derry Port sanitary board has just held a remarkable meeting, the members leaving Northern Ireland to go into the Free State to deal with the business for which the meeting was summoned.

The board crossed the border in taxis to inspect its hospital at Ballyrattan, near Moville, in County Donegal, a hospital which has never had a patient since its opening thirteen years ago. It was built to deal with cases of infectious disease on vessels coming to Derry, but before its completion, the border had been created, with the result that the board was left on one side of the border and the hospital on the other.

No solution of the situation has ever been devised and the board decided to effect repairs to the institution, the chairman remarking that "the present state of affairs cannot go on forever."

It Could Be Done

Midland Gardener Used Only Waste Water For Plants

At the Midland Bank Horticultural Society's show it was remarked that the winner of seven prizes exhibited blooms watered entirely with wastewater, bath-water, basin-water; at any rate not fresh tap water, of which he proudly boasted that he had not used a drop in his garden during these months of drought.

It can be done. Therefore it ought to be done—as King Edward was fond of remarking mainly of things that were not done in his time. Do not ask us, please, how to get or convey bath water. Either find out, or don't use any water. A moral maxim for horticulturists.—London Daily Mirror.

Switzerland Heads List

Leads All Countries In Annual Consumption Of Milk

Statistics released by the Department of Agriculture show that Switzerland leads all other countries of the world in the annual consumption of milk, with 280 quarts per person. Second place for this distinction is shared by United States and Germany, each of which boasts of 220 quarts per person. Canada ranks next with 200 quarts.

The figures on other large milk-drinking nations also computed annually and per person, are as follows: Great Britain, 120 quarts; France, 100 quarts; and Chile, 30 quarts.

Doorkeeper—Say, come back. Dogs are not allowed in here, sir.

Visitor—That's not my dog.

Doorkeeper—Not your dog? Why, he's following you.

Visitor—Well, so are you.

Little Journeys In Science

CORN PRODUCTS

(By Gordon H. Guest, M.A.)

Corn, which grows abundantly on this continent and in the West Indies, is perhaps one of the most widely used grains. Apart from being a common food in the form of meal or cereals, the kernel when opened, is found to have three parts: the outside, or husk, the small oily germ, and the mass of white material which is mostly starch.

One bushel of corn gives approximately one pound of oil which is refined and sold as a vegetable fat for cooking. The less refined grades are utilized for soap making or for the production of glycerine and nitroglycerine.

Starch from the corn is made into corn starch, for cooking, and into laundry starch.

Another important use of this grain is in making corn syrup which is a widely used product. Corn syrup is made by converting the starch in the corn into a sugar, known as glucose, through treating it with acid in large pressure tanks under fifty pounds of steam. This treatment changes the starch into the thick sweet substance which we know as corn syrup.

From corn also is extracted a type of gum, which is used in place of rubber to some extent. "Red rubber" erasers and sponges may be made from this substance. It is also used in the manufacture of rubber soles for shoes.

Outer husks of the corn and some residue of the oil products are made into cattle food, adding still another to the many products of this common grain.

BABY SCALDED!

Quick! Get the MECCA OINTMENT

Radio-Telegraphic Service In Northern Hinterland Now Proving Of Great Importance

Radio telegraphic business in the North West Territories is increasing with indications the current year may establish a peak for the service. Installed about six or seven years ago the chain of wireless stations, operated by the Royal Canadian Signals, a branch of the permanent force, is busier with commercial traffic than with official or departmental work. This chain extends from Edmonton to McMurray and from that point, which is the terminus of the landline, down to the mouth of the Mackenzie River.

The principal stations are at Fort Chippewyan, Fort Smith, Rae, Reliance, Fort Norman, Cammell River and Cameron Bay on Great Bear lake, and Akklavik. Two radio boats are operated in the Yukon, at Mayo and Dawson. The most northerly is at Herschel Island.

The general movement into the north country has emphasized the importance of the government's chain of wireless stations. Mineral deposits around the shores of Great Bear lake have resulted in the establishment of numerous small settlements in that region, while reports issuing from Fort Chippewyan indicate a rush of gold prospectors to the latest discovery on Lake Athabasca.

Of prime importance, particularly to agriculturists and to shippers of perishable goods, are the daily meteorological reports sent by the government signalers. The weather for the North American continent is "made" in the valley of the Mackenzie River, and the compiling of these at Toronto constitutes one of the most important of government services.

Highest In World

Great Britain Nets Millions From Succession Duties

The St. Thomas Times-Journal says: "In no country are the succession duties so high as in Great Britain, where, if the estates are large enough, the Chancellor of the Exchequer confiscates almost the lion's share of the amount. The Cowdray estates are a case in point. 'The first Lord Cowdray died in 1927, leaving an estate valued, in dollars, at 20,000,000. The death duties amounted to \$8,000,000. In 1932, his widow died, her estate probating at just over \$7,000,000. Of that amount the Treasury garnered exactly \$3,000,000. This year the second Lord Cowdray passed away leaving about \$2,500,000, and the duties were around \$750,000.

"So that these three deaths netted for the government nearly \$12,000,000 out of an estate that was originally \$20,000,000.

There is not much left for the third Lord Cowdray, who is the only son, and his five sisters. The British Treasury certainly makes the rich pay."

Bishop's Bribe Shown

In Cathedral Paintings

Structure Said To Have Been Built As Penance

Wall paintings 900 years old have just come to light in Norwich cathedral, England, as the result of restoration work by Professor Tristram of the Royal College of Art.

Especially interesting are three medallions supposed to depict the life story of the cathedral founder, Bishop Herbert de Losinga. The paintings bear out in a remarkable way the tradition that Losinga built the cathedral as a penance for buying the bishopric.

One medallion shows the bishop passing money across a table. The next shows him clothed in the full robes of a bishop with hands joined in prayer, and the last one is a picture of the completed cathedral. Professor Tristram says the paintings may last another 100 years.

A novelist, who confesses that he is a bad sailor, declares that he has never yet discovered any pleasure in a sea-trip. As far as he is concerned, it is all bunk.

W. N. U. 2083

Development Of Television

Trials Made In Germany Said To Have Resulted Favorably

The German post office announces a spectacular plan to introduce "television-telephony" in the near future.

Trials between Berlin and Munich were reported to have resulted favorably. Postal authorities planned to install television-telephone net between the larger cities, further extension of the system depending on public reaction "because of the still high cost of apparatus."

The announcement was made while Germans still thrilled at what technicians called "satisfactory" sound film broadcasts, which were demonstrated at the 11th German radio show by means of a "television car."

Daily transmission of tone films taken from the top of a television car of the German Radio Company stationed in the immediate vicinity of Berlin's radio tower captivated thousands at the radio show.

Scenes were shot with an ordinary sound picture camera from the top of the car and were developed and ready for reproduction after 75 seconds. The car was equipped with developing and transmitting apparatus.

The technical side of the procedure reveals that each picture is dissected into dots by means of a perforated disc. The dots are converted into electric impulses which are broadcast on a seven-metre wave length while sound is transmitted simultaneously over an ordinary radio wave.

Technical appliances permit transmission of 30 pictures a second.

The receiving set is equipped with a large tube based upon the cathode ray system. The tube produces a short stream of invisible electrons which are thrown on a fluorescent screen. The pictures appear clearly.

Should A Duck Swim?

Too Much Exercise Bad For Them States Authority

From the creation of the first farmyard a pond has been regarded as the essential complement to the duck's happiness.

Now comes "Duck and Goose," a bulletin published by His Majesty's stationary office, to chide the farmer for believing that his ducks should swim. Swimming is only a purposeless recreation where ducks are concerned, according to his authority.

Though it is grudgingly admitted that swimming tends to keep ducks clean of body and contented of mind.

Swimming, says the bulletin, provides the ducks with too much exercise.

"It is dangerous for any girl to throw herself at a man, however eligible he may be," we read. But where is the danger if he is a good catch?

Efficiency Of Inspectors Has Made The Dominion The Best Egg Market In The World

Starting Western Career

America Recognizing Importance Of Soy Bean, Popular In Asia

The soy bean, which is the sustenance of so many millions in Asia, is beginning to have a career in America. Those who do not know about the soy bean have to have its excellence broken to them gently or they will be unable to accept all the glowing testimonies paid to its worth. Soy beans are as good as a wife and family and a farm to boot, if one ever does boot a farm. They can be made into almost anything, including fresh milk from the cow without the intermediary assistance of the cow.

Soy beans can also be made into various foods and into motor car accessories, fuel oil, glue, soap and other commodities. Henry Ford has an idea that soy beans may turn small farms into factories, for once the beans are raised they can be manufactured into almost anything the farmer chooses. Ford is encouraging this view by planting a model plot and having them displayed in Chicago. They are not yet being raised in quantity, but if the farmers of America once start growing them, their hardy qualities will make them a favorite crop. The Chinch bug won't touch them, though other caterpillars and their toothsome. — Hamilton Spectator.

Objects To Purple Roofs

Lord Leverhulme Has No Freak Buildings On His Estate

Plans for preserving the amenities of the countryside were revealed by Lord Leverhulme at a meeting in London, where he spoke of a ban on sham timber and the prohibition of purple roofs in his Cheshire estate. "On my estate in Cheshire," he said "I have a rule that no building may be erected on any land I sell or lease without the plans and elevations being approved by my advisory architect."

Some conditions Lord Leverhulme imposes are yellow brick not to be used in the elevations; terra-cotta, glazed or hard patent red bricks are not to be used in face work; purple slates are not permitted on roofs; all half-timber work must be properly constructed and framed together and must not be sham; and no colored glass shall be permitted in the windows.

Within reasonable limits, his lordship added, a great deal could be done to prevent some of the bad development at present taking place.

Cactus plants cannot live without water, and they grow better in nature if they get a good deal of moisture.

The famous dust storm of 1901 which fell practically all over Europe had its origin in the Sahara Desert.

Price cutting through misrepresentation of quality is effectively controlled in Canada so far as eggs are concerned through the rigid application on consuming markets of the egg grading regulations. The egg inspection staff of the Poultry Services of the Dominion Department of Agriculture is constantly guarding the interests of the producer in this respect. Since the first of the present year twenty-eight prosecutions have been conducted against wholesale and retail distributors in the larger centres for misrepresentation of grade. All these prosecutions were successful and fines were levied in each instance. The minimum fine under the Egg Regulations is \$25 and the maximum \$500.

The Canadian Egg Grading Regulations were designed with one major object in view, namely, to improve prices and marketing conditions in the interests of producers. In the various activities of the egg inspection service none is regarded as more essential than that of preventing eggs of an inferior grade being sold under a higher grade at reduced prices.

The majority of wholesale and retail distributors of eggs in Canada make an honest effort to sell eggs under their proper grade. Occasionally, however, in the stress of business competition, an attempt is made to gain trade through offering at reduced prices eggs which are represented to be of the highest grade but which really are of inferior quality. There is, also, a certain class of traders with whom such practices are common. If a constant check on misrepresentation of this nature was not maintained the result would be a continual decline of egg prices.

The quality and grading of eggs in wholesale and retail stores is subject to continual supervision by officers of the Dominion Department of Agriculture egg inspection service. Where eggs are below grade they are required to be repacked or marked with their proper grade name. Shipments from a wholesaler to a retailer, when found below grade, are required to be returned to the seller. Where infractions are continued or flagrantly deliberate, legal action is taken. This constant vigilance on the part of Canada's egg inspectors has made the Dominion over a period of years, the highest priced egg market in the world.

Will Improve Conditions

Philadelphia Zoo To Use Moats Instead Of Fences

With a view toward providing the animals with conditions approximating their native habitats, the Philadelphia Zoological Garden is now engaged in an extensive program of eliminating fences around animal runs.

Soon all the animals in the zoo, including lions, tigers, leopards, etc., will be roaming about in areas resembling their natural habitat, with no suggestion of an enclosure between them and the public.

This will be accomplished by substituting wire fences with deep, concrete-faced moats, over which it will be impossible for the animals to leap.

Looking across the moats, which are concealed by a slight rise in the ground level, visitors are given the impression the animals are roaming about free, with no enclosure of any sort.

Two such "fenceless runs" built with CWA funds, already have been opened. One is occupied by the bison herd, while the other run is occupied by two bad-tempered llamas.

In a make pit, built along similar lines as the "fenceless runs," visitors may view more than 100 lizards, turtles and snakes mingling together in their natural surroundings.

Variety Of Products

Canada shipped a large variety of products to South Africa last year—over 200 different commodities, including apples, rolled oats, wheat, flour, canned vegetables, binders, tannin, preserved fish, lumber, agricultural and other implements, etc.

HIS MAJESTY LENDS A HAND

King George joins with the crew in hauling on the main sheet of his yacht "Britannia", which won the race for big yachts at the Royal Southampton Yacht Club Regatta at Cowes, Isle of Wight.

What Does Your Handwriting Tell?

By LAWRENCE HIBBERT
(Grapho-Analyst)

(All Rights Reserved)

Handwriting analysis, to be accurate and helpful to the writer, must be based on lengthy research and a painstaking regard for basic values.

I am repeatedly asked if there is anything magical about character reading from handwriting. So I am taking this opportunity of again stressing that when I make an analysis of a specimen of hand writing, I am not literally taking a rabbit out of your best hat, in the approved conjuring manner!

It may seem to the lay-person that, for a Grapho-Analyst to give what turns out to be an accurate analysis from handwriting, is to perform a regular magician's trick—a sort of Houdini cum Maskelyne, cum Thurston device.

Nothing could be further from the truth. It is simply a scientific evaluation of the indications revealed to the practiced grapho-analytic eye by the handwriting specimen. When you go to a doctor, and he tells you that you have a certain organic ailment, you do not imbue him mentally as a magician. You know that his medical education, his training, his research and his practice, have all coalesced into an ability to diagnose ailments. He himself will not regard himself as infallible; he may, quite possibly, call in extra-medical advice from his confreres.

And even if, on an occasion doctors do, he makes a mistake, you do not stigmatise a modest man as a quack. . . . Because doctors have not yet found a cure for cancer, you do not hesitate to go to a medical man when you are suffering pain, or feel that you have some physical derangement.

Grapho-Analysis, like medicine and surgery, is still searching for hidden truths about its own science. It is making tremendous and rapid strides. But do not damn it because, sometime in the past, you have been dissatisfied with one particular member's analysis.

I have been asked of what practical value is it to people to have their handwriting analysed. As well might one ask what use is it to a salesman to learn how to become a better salesman; or a business man to know more about his business; or a nurse to gain a better understanding of, and more tolerant sympathy with her patients.

For, as all these are sensible suggestions, so is it just as essential for you to know yourself. Grapho-Analysis shows you not only your general characteristics, but hidden tendencies that may burst into characteristics at any time.

It shows you where are your faults, and thereby gives you a chance to correct them. It always puts a peg on the path to greater personal understanding, and enables one to get more from others.

Here are a few brief extracts from analyses made for readers:

E. C.—There is a frank, generous and sympathetic nature revealed. One who longs for affection, but is sensitive to praise or blame; too sensitive, perhaps, to criticism, and strong desire for intellectual companionship, and have a love of the beautiful in nature.

T. A.—Your writing shows that you have an enquiring turn of mind; you wish to get to the bottom of things, but you are inclined to be a little forgetful about those things in which you are not interested, or to slight them. Don't let this grow.

A. W.—You have a material nature, and are likely to consider your own interest at all times, before responding to appeals from others. You are not inherently generous. Do not let this tendency develop into "tightness" or "meanness".

Do you want a personal analysis of your own handwriting, showing your faults and virtues? It will probably amaze you with its revelations of your character, and may open the door of opportunity to you. Send a letter in your normal writing, and state your age, birthdate. Enclose with 10c coin (for each specimen) and 3c stamped address envelope to: Lawrence Hibbert, Grapho-Analyst, c/o Winnipeg Newspaper Union, 170 McDermott Ave., E., Winnipeg.

Racial Prejudice

Britisher Says Canadians Will Find Strength in Union

Citizens of the Dominion are they of French, English, Jewish, Swedish, Irish or Scottish ancestry were warned against racial prejudice and urged never to forget that first, last and always they are Canadians. Reminder that "you will find strength in union" came from Rt. Hon. H. A. L. Fisher, former minister of education in Great Britain and warden of New College, Oxford, speaking at a civic luncheon in Montreal tendered the official delegates of Great Britain, France and the United States to the quarter-century Jacques Cartier celebrations.

Colonization Finance Corporation

Inspection Trip To The West By
Officials Of The Organization

Mr. Louis L. Lang, of Galt, Ontario, president of the Colonization Finance Corporation, stated on arrival at Winnipeg, "This is the second inspection trip made by myself, but is the first trip which is being undertaken jointly with executive officers of member companies associated in the work of the Colonization Finance Corporation. My colleagues on this inspection tour are, Mr. J. F. Weston, vice-president of the Colonization Finance Corporation and managing director of the Imperial Life Assurance Company; A. N. Mitchell, general manager of the Canada Life Assurance Company, and W. H. Somerville, general manager of the Mutual Life Assurance Company. We are interested in the farm management program of our corporation because we realize what improvement to agriculture means to Eastern Canada as well as to the business interests in the West. This year marks the fifth year of the operation of our corporation. Beginning in 1930 with 25,000 acres under the supervision of two farm managers, we have at present a field staff of fifteen farm managers and assistant farm managers covering all of Manitoba and Eastern Saskatchewan. The some farm managers' headquarters are at Winnipeg, Carman, Portage la Prairie, Brandon, Killarney, Deloraine, Virden, Birtle and Dauphin in Manitoba; and Oxbow, Moosomin, Weyburn, Indian Head, Yorkton, and Canora in Saskatchewan. These men have under their supervision 1,763 farms, totaling 602,382 acres. About 70% of these farms are occupied and operated by their farmer owners—the interests of our member companies being represented by mortgage or an agreement of sale. Only 30% of the farms are operated by tenants. One of the objects of our work is to assist farmers to retain the farms they are at present operating by co-operating with them in any improvements which are possible, and also to make it possible for a substantial number of tenants to purchase the farms which they are at present operating under lease. The farm management service supplied by the Colonization Finance Corporation covers the present and all of the arable land in Manitoba from the International boundary north to township 36, and the Eastern part of Saskatchewan as far as Regina. On July 1st we established a farm management zone in the Swan River area. The only district we had not covered until this inspection trip

for my associates and myself is to inspect the work which is being carried on, to note how it is being regarded by the individual farmers and the communities and districts in which we operate, and to give us the necessary information with which we can formulate a policy for the future of this work, which I believe to be worth while. As rapidly as conditions warrant, and as qualified men can be obtained and trained for farm managers, we hope to open new zones. The necessary attention to detail and the cost of this work are naturally limiting factors.

While Mr. Somerville and I hope met most of the farm managers I met, I am particularly pleased with the conference arranged at Clear Lake in the Riding Mountain National Park which will give Mr. A. N. Mitchell, and our Vice-President Mr. J. F. Weston, an opportunity of meeting and sizing up our men in the field.

There was one change made in our personnel during the year, Mr. O. S. Longman, zone manager at Indian Head, was appointed Field Crops Commissioner for the province of Alberta and he was succeeded by Mr. W. C. McKilloch, former Dean of the Manitoba Agricultural College whose zone we shall visit. Our trip last year took us through Southern Manitoba, particularly that portion affected by the drouth, and Southern and South Eastern Saskatchewan. This year we have planned to visit the eastern portion of the Red River Valley; we shall visit the Portage Plains and the Morden and Carleton Place districts, and we expect to visit the Swan River Valley. We shall be accompanied by Mr. W. H. Somerville, zone manager at Indian Head, and Mr. J. F. Weston, vice-president of the Colonization Finance Corporation in the West, and Mr. Mitchell, general manager of the Canada Life Assurance Company in Saskatchewan. We shall bring our inspection trip to a close at Regina, after which some of our party are returning East while others are proceeding westward on business of their respective individual companies.

Basis For Security

Complete prevention of war, not "simply" a futile attempt to humanize it, will give the world the security it wants, Arthur Henderson, president of the disarmament conference, told the Co-operative Societies of England at a meeting in London.

SUNDAY SCHOOL LESSON

SEPTEMBER 16

ISAIAH CONTRASTS FALSE AND TRUE WORSHIP

Golden text:

Who shall ascend into the hill of the Lord?
And who shall stand in his holy place?
He that hath clean hands, and a pure heart; Psalm 43: 4.

Lesson: Isaiah 1:1-31.
Devotional Reading: John 4:20-24.

Explanations and Comments

The Perverseness of God's People, verses 1-9. "The Great Arrangement" is an apt phrase given to this chapter by Ewald. God's chosen people have rebelled against him. Even the dumb animals, the ox and the ass, are responsive to their masters, but the people of Judah do not consider their Lord. This perverseness has brought punishment upon them, and it is only because of Jehovah's mercy that they have escaped the fate of the people of Sodom and Gomorrah.

Outward Signs of Religious Zeal Do Not Deceive Jehovah, verses 10-15. The prophet Isaiah now hears in spirit the remembrance of his audience, Isaiah thinks. "They would faint represent the accusations which he had just uttered as unfounded, by appealing to their exact observance of the divine law; but in opposition to his grand old self-justification which the prophet has read out of the hearts of those impeached, he but proceeds to prove the divine arraignment which begins in verse ten."

"Hear the word of Jehovah, ye rulers of Sodom," the prophet cries; "give ear unto the law of our God, ye people of Gomorrah." By addressing them as "rulers of Sodom" and "people of Gomorrah" he reminds them alike of their wickedness and of their danger. The "law" to which he has taken his stand, is the law of the inspired discourse he is about to deliver.

"What unto me is the multitude of your sacrifices?" saith Jehovah: "I have had enough of the burnt-offerings of rams, and the fat of fed beasts; and I delight not in the blood of bullocks, or of lambs, or of he-goats." Their altars reeked with the blood of sacrifices, but it was all an expression of religiousness, not of religion.

The Nature of True Worship, verses 16, 17. "Wash you, make you clean; put away the evil of your days before mine eyes." "Wash you, make you clean" are figurative words for

repentance and amendment. Recall David's cry after his great sin: "Create in me a clean heart, O God, and renew a right spirit within me."

"Cease to do evil; learn to do well." It is not enough to cease from sin. True worship consists also in right living, in service for others.

Silence Zone

Motor Horn Order Gives British People A Chance To Sleep

An "anti-honking" order to motorists during sleeping hours has proven so successful in London that the ministry of transport has decided to extend it to every city, town and "built-up" area in the country.

Thus England will become a vast silence zone between the hours of 11:30 p.m. and 7 a.m. so far as motor horns are concerned.

Gliding tests are to be made by German air pilots over the South Atlantic.

HITLER DECLARES REVOLUTION IN GERMANY AT END

Nurnberg, Germany.—Adolf Hitler, dictator of Germany, declared here: "The National Socialist revolution is ended. It has fulfilled all its hopes."

This declaration he made at the annual convention of the Nazi party, through Robert Wagner, Baden Nazi district leader, who read the proclamation.

Der Fuehrer said revolutions which took a permanent character resulted in anarchy and chaos and merely served the purposes of greedy politicians, and that an evolution had to come to bring about better conditions.

The German leader said the German way of life was fixed for the next 1,000 years, during which time there would be no further revolutions. He described the German regimes of the past 60 years as run by international freebooters and pot-house politicians. He declared later generations would exalt the accomplishments of the Nazi movement as the "German miracle."

Then he turned to the recent plebiscite, and stated:

"If foreigners imagine the 4,000,000 'No' voters constituted a dangerous opposition, they are privileged to smile. . . . Our next attack will demolish the opposition."

Hitler reiterated that Germany while insisting on her own right, wanted peace and friendship with others.

He took up the subject of religion, saying: "We have endeavored to reconcile the religious confessions with the new state. As far as the Protestants are concerned, we are determined to weld them into one great evangelical reich church."

Concerning the Roman Catholic Church, he said: "Despite lapses on both sides, we shall arrive at a sincere and honorable understanding."

Hitler concluded with a statement that the program was to consolidate the party organization such as the Schutz Staffel, or picked guard, and the storm troops, into one solid bloc purified of all elements that were not heart and soul with them, to win over all those who still held aloof.

Customs Officers Seize Opium

Tins Concealed In Third Class Stateroom On Liner

Vancouver.—Opium valued at \$6,000 was seized by Canadian customs officers on board the Canadian Pacific steamship liner Empress of Asia here.

The opium, contained in 200 one-half tins, was concealed in the false bottom of a wardrobe cupboard in a third class stateroom in the after part of the ship.

One-half tins have seldom been seen here, most of the opium seized being contained in five-tael tins. Authorities believe the drug was intended for either Honolulu or Manila.

It was the first opium seizure here in months. No arrest has been made.

Frost Damages Oats

Prospect Of Seed In North Is Not Promising

Prince Albert, Sask.—Frost has taken its toll of oat fields in northern Saskatchewan and the prospect of seed for the 1935 crop is anything but promising. R. B. Tooley, chief supervisor of the Soldier Settlement Board, Saskatchewan branch, stated here.

The quality has deteriorated in some districts to such an extent it is unlikely farmers of the north will have a surplus for seeding the 1935 crop, Mr. Tooley said.

Oppose Emigration Plan

Weymouth, Eng.—Delegates to the Trades Union congress were warned by J. McLeod, Canadian delegate, against emigration schemes "put forward by some members of the House of Commons." He declared such schemes would be "fraught with difficulties, privations and want" unless there was provision for substantial government grants covering a period of years.

W. N. U. 2063

St. Lawrence Waterway

Matter May Be Taken Up In Next Session Of U.S. Senate

Hyde Park, N.Y.—Frank P. Walsh, chairman of the New York power authority, after a talk with President Roosevelt, predicted re-submission of the St. Lawrence waterways pact with Canada to the next session of the United States senate and its ratification.

He has just returned from the northwestern states.

He issued the following statement after his visit with Mr. Roosevelt:

"The project will be re-submitted at the January session, and I am confident construction work will get under way in the spring. The Great Lakes and the St. Lawrence river are perhaps our most valuable natural resources, and they will be fully developed and utilized in the public interest, for both power and navigation purposes, as an integral part of the public works program."

"The present Roosevelt administration will build the St. Lawrence project, and thus give the United States a new seacoast 3,800 miles in length, placing Chicago, Milwaukee, Cleveland, Detroit, Toronto, Superior, Duluth and other great inland cities on deep-water, and give the northwest 1,000,000 horsepower of the cheapest electricity in the world."

Need Larger Army

U.S. Secretary Of War Says Present Force Is Inadequate

Raritan Arsenal, N.J.—Secretary of War George Dern said the United States needed a larger, more effective regular army.

The secretary, who came here for the concluding four days of the army's war game manoeuvres against an imaginary enemy invader, said he thought the regular army was not adequately equipped at present, and advocated increasing its strength from 125,000 to 165,000 men.

"The army," he said, "is sadly in need of modernization and mechanization. At its present size the army is not large enough to perform all the peace time tasks assigned to it."

Heard The Program

Manager Of Arctic Post Gets Radio Broadcast From Steamship

Montreal.—"Oh, yes, we heard your speech and also the piccolo," said the manager of an Arctic post of the Hudson's Bay Company to its governor, Ashley Cooper. "The piccolo," Mr. Cooper said, in telling of the incident of the mail service ship, was a bagpipe broadcast. Mr. Cooper has just returned from visiting the company's northern stations in the steamer Nascope. During the trip he broadcast addresses and a piper played reels on the bagpipes.

Criticizes Paintings

Toronto.—George Leroux, official representative of the Academie des Beaux Arts, Paris, France, criticized the paintings by Canadian artists who originally comprised the "group of seven" during a visit to the Canadian National Exhibition art gallery. The French artist said the paintings were unnatural and lacked the spirit of love.

To Test Sobriety

Moscow.—An instrument to test sobriety, called an alcoholometer, has been introduced to police stations in Soviet Russia. The suspect is required to breathe through the neck of a glass tube, filled with colorless liquid, for 15 seconds. If the suspect is sober, the liquid becomes pale red; if drunk, a cloudy grey.

Use Canadian Coal

Ottawa.—For the purpose of encouraging greater use of Canadian mined soft coal, the Dominion government has restored the 99 per cent drawback on imported bituminous used for cooking purposes providing the coke manufacturers use 35 per cent Canadian coal.

Market For Bacon

Toronto.—Canadian farmers who could supply the British market with a continuous supply of high quality bacon had unlimited opportunities, Canadian National Exhibition directors were told at a luncheon by Hon. G. Howard Ferguson, high commissioner to London.

FIRST WOMAN PILOT

Mrs. Amy Johnson Mollison, the first woman appointed as regular pilot of a transport plane on the London-to-Paris route, explains that she took the job for experience in all-weather flying in preparation for a London to Australia flight this fall.

In Favorable Position

Canada Is Friendly In Relations With Other Countries

Montreal.—While abroad there is little cause for "cheerful spirit," Canada is in a favorable position, its relations with other countries being friendly, the committee on international relations reported to the Canadian Bar Association in annual convention here.

At present, the report notes, the whole world is faced with a situation in which members of each of the many groups are discussing how best to destroy one another. Each of them is silently conscious that both defender and aggressor in any conflict will be destroyed as a likely result, without any assurance that one group or nation will emerge clearly dominant, the report contends.

Call Of The Clouds

Col. Bishop, War Ace, To Take Up Flying Again

Montreal.—The call of the clouds has once more gripped Canada's ranking wartime flying ace, Lieut. Col. W. A. Bishop, V.C. After an absence of 12 years from active flying, he has decided to climb back into the cockpit. He is now taking instruction at the Montreal Light Aeroplane Club field preparatory to regaining a pilot's license.

Col. Bishop, however, is only going into flying again for personal reasons. He wants to be able to commute between Montreal and his summer home in Muskoka, Ont.

PRINCESS MARINA TO FLY TO ENGLAND

News comes from Yugoslavia that Prince George and Princess Marina, whose engagement was announced a few days ago, will fly to England to receive the blessing of King George and Queen Mary. The 27-year-old Greek Princess and her British fiancé, are shown above. It is expected the wedding will take place at Westminster Abbey some time in December.

Women Out Of Industry

Mussolini Plans To Replace Men In Jobs Held By Women

Rome.—Benito Mussolini was reported planning to take all women workers out of Italy's industry.

Two reasons it was reliably learned, influenced Il Duce in his decision. Jobs, he holds, interfere with what he believes to be woman's primary duty, the building up of families and the increase of Italy's population.

The positions women hold should be filled with men, thus decreasing unemployment and raising the morale of the people.

An editorial in Mussolini's newspaper, Popolo D'Italia of Milan, tended to confirm the report that he will move to eliminate woman workers.

Deal With Health Matters

Would Hold Special Conference With Provincial Representatives At

Ottawa.—A special conference of provincial representatives at Ottawa to discuss health matters is being considered, Hon. G. M. Weir, British Columbia provincial secretary, stated here. This province is particularly interested and would support central control for dealing with major health problems.

Dr. Weir stated B.C. is paying \$700,000 a year for the health bills of persons from other provinces.

Try For New Record

Sir Malcolm Campbell Plans To 'Speed At Five Miles A Minute

London.—Sir Malcolm Campbell, Britain's auto speed king, disclosed at a luncheon here that his plans were about complete to make another assault on his own world automobile speed mark at Daytona Beach, Fla., in January. It was there he set the present standard of 272.108 miles an hour a year and a half ago. Since then he has remodelled Bluebird, his racing car.

His goal is a speed of 300 miles an hour—five miles a minute.

Rests With Membership

Socialist Party And C.C.F. Taking Vote On Merger

Vancouver.—The proposed merger of the British Columbia branch of the Co-operative Commonwealth Federation and the Socialist Party of Canada will rest with the general membership. The C.C.F. provincial council has decided to submit the question to a referendum of members of each constituency body. The vote will be taken as soon as possible and a return must be made within 90 days.

A DEMAND FOR CANADIAN WHEAT IN UNITED STATES

Winnipeg.—With a shortage of Durum wheat in United States becoming more and more apparent, demand for Canadian Durum wheat by United States mills reached a season's peak on the Winnipeg Grain Exchange with the movement south of the international boundary approximating 500,000 bushels. Such exports total about 1,000,000 bushels covering this last two weeks.

Recently top grades of Durum wheat were commanding a 32-cent premium over the September future at both Duluth and Minneapolis, while Canadian Durums were quoted at 17½ cents over Winnipeg October option. This brings the Canadian Durums quotation to approximately \$1 a bushel which despite the 42-cent-a-bushel duty and 2½ cent-a-bushel handling charges still makes the Canadian grain considerably under the United States price.

The United States Durum price at Duluth was \$1.28½ per bushel plus 32-cent premium making a total of \$1.60½.

Bulk of Canadian Durum wheat is grown in Manitoba and supplies of this variety are being quickly cleaned up.

U.S. Textile Strike

Two Men Killed And Many Wounded

Washington.—Rioting and death suddenly punctuated the gigantic United States textile strike even as capital and labor prepared to lay their grievances before a board of President Roosevelt's choosing.

Two men were killed, another was near death, more than a score were wounded by bullets and clubs as a wave of violence surged through the strike-torn mill towns of Georgia and the Carolinas.

Francis J. Gorman, chairman of the textile strike committee, blamed "management and reactionary public officials" for the bloodshed. He warned that a continuance would awaken "all the bitterness that can be aroused" in the ranks of the textile army.

France Has Suggestion

Wants To Collect Large Sum From Germany For Saar Valley Mines

Paris.—France, conceding the Saar valley may vote to become a part of Germany, has suggested Germany start figuring now how to pay for \$100,000,000 worth of French mining properties in the territory.

In a note to the League of Nations France asked that the league avert trouble after the Saar plebiscite next January by having Germany make proposals relative to payment for the French holdings. France intends to collect "in gold."

Scott Accepts Post

Toronto.—The provisional committee of the Canadian corps council, organized following the veterans' reunion here early in August, has received acceptance of the honorary presidency of the council from Archdeacon F. G. Scott of Quebec, "beloved padre" of the Canadian forces overseas.

Would Build Pulp Mill

Vancouver.—Possibilities for a sulphide pulp mill on the British Columbia coast are being investigated by R. O. Sweeney, Montreal financier, for British capitalists interested in supplying England with raw material for artificial silk and paper manufacturing, he said here.

Flagship Leaves Vancouver

Vancouver.—H.M.S. Norfolk, flagship of the British West Indies fleet, sailed from here after a four-day visit, bound for her base at Bermuda and thence to England. She is due at Bermuda, October 17, and will return to England the following month.

Turkey Would Join League

Gineva.—Turkey has decided to present herself as candidate for the League of Nations council seat to be vacated this month by China.

LIBERAL MEETING AT DRAYTON VALLEY.

Hon Charles Stewart and Geo. J. Bryan spent last Friday in the Drayton Valley and Rocky Rapids country. In the evening a large meeting was held at Drayton Valley. Although only two days' notice had been given of the meeting, the school house was packed to the doors. The fine reception given the speakers showed the feeling of the district. From the comments made by the people at the meeting it was very evident that there was a lot of dissatisfaction with the present government, especially on the question of the handling of relief.

The Winning Policy.

There are two ways of meeting competition, says a writer in the Athabasca Echo. One is to crab at the competitor. The other is to go serenely ahead, rendering the greatest possible service, wishing the other fellow well, and concentrating upon constructive effort. This is the winning policy in the long run.

Duffield Doings.

Monday's big rain storm caused another delay in harvesting operations in this district.

The Duffield Athletic Club will hold a meeting tonight, to discuss the matter of paying bills incurred at the time their Sports Day was held last June. The Chairman of the Printing and Advertising committee is expected to attend.

THE HUNTING SEASON OPENS ON SATURDAY.

The feathers will begin to fly on Saturday at noon, as at that time the hunting season for geese, ducks and snipe begins, attracting sportsmen from far and near. Under the new Game Regulations the season for duck shooting north of the International boundary opens Sept. 15 and closes Nov. 14. It is reported that both ducks and geese are quite plentiful. Hunters will have 2 weeks longer than last year to shoot Hungarian partridge. This year the season for these birds closes Dec. 15; last year it was Nov. 30. There is no change in the opening date, Sept. 15. Blue grouse, ruffed grouse, spruce partridge and ptarmigan may be shot from Oct. 1—15.

Deer, moose, caribou may be shot Nov. 1 to Dec. 14. At the sporting goods shops which handle firearms, shells, etc., there is considerable activity, preparatory to the opening of the season, and local window displays are quite attractive.

Truck Catches Fire.

Motorists returning from the City late Monday night were startled, when nearing St. John schoolhouse, to see a passing truck burst into flames. Assistance was offered but the fire had burst thru the floor boards so suddenly that the occupants had to jump for their lives. The truck had come from Spruce Grove, where it is said the engine had been overhauled. The vehicle belonged to Zander Brus.

Interior Decoration.

For the first three days of the week Miss MacIntyre, of the Alberta Women's Bureau (Department of Agriculture) had been giving a short course at the Town hall, on the subject of "Interior Decoration." The sessions had been well attended.

Open Seasons for Game.

Deer, moose, Nov. 1 to Dec. 14
Ducks, geese, Sept. 15 to Nov. 14
Elk, Oct. 1—Dec. 14
Grouse, Oct. 1—31
Hungarian Partridge, Sept. 15—Nov. 30
Fox, Nov. 1—Jan. 31
Mink, martin, otter, Nov. 1—March 31
Muskrat, March 1—April 30

BYLAW No. 10.

The Council of the Municipal District of Inga No. 520, duly assembled, enacts as follows:

1—Any person committing a breach of any of the provisions of any of the Bylaws of the Municipal District of Inga No. 520, now in force, or which may hereafter come into force, shall on summary conviction thereof before a Police Magistrate or Justice of the Peace, forfeit and pay (except where other provision is specifically made therefor) a penalty not exceeding \$100.00 in addition to the costs of the conviction for each offence.

2—In default of immediate payment of any fine or penalty herein provided or specifically provided in any other bylaw or any penalty and license fee, where provision therefor is specifically made, and of the costs of conviction or of such penalty, license fee or costs, as the case may be, imposed by the convicting Justice, the same shall be recovered and enforced as by bylaw provided. DONE AND PASSED in Council this 22nd day of May, 1934.

Certified to be a true copy of Bylaw No. 10.
Signed, R. C. HOWAT, Reeve.
Signed, JOSEPH BEST, Sec. Treas.

THE NEWS OF STONY PLAIN AND DISTRICT.

Mr Carl Enders is leaving shortly for Wembley district, where he will start threshing operations.

Miss Peggy Aitken started giving her lessons in dancing at Kelly's Hall yesterday afternoon.

Some disappointment was felt by the ball fans when a phone message from the City on Sunday announced that the A. & N. Cubs were unable to keep their game appointment here that afternoon.

The official list of Text Books for 1934-5, issued by the Department of Education, can be seen at Sun Office.

BUTTER AND EGGS WANTED
at The Royal Cafe.

Alberta to Export Hay.

Canada has placed an embargo on exports of fodder. The U.S.A. has removed the import duty of \$5 a ton on hay. Some exports will be made from Canada under government direction, but the hay crop in this country is not large this year. The drought stricken areas of the prairie provinces will need a lot of hay; the northern areas have an abundant supply. Northern Ontario has a good hay crop; the southern areas of that province have but a 50 p.c. crop. There is a shortage in the Maritimes.

RUSSIAN WHEAT SITUATION

(Annual Average Wheat Production 880 Million Bushels)
It is estimated that since 1916 the population in Russia has increased by at least 25 million persons, which means that Russia's annual requirements of wheat are at least 125 million bushels per annum more at this time than they were in 1916. Her production of wheat in 1916 is not accurately known, but it can be said with fair accuracy that the average annual production for the past two or three years has been very little, if any, greater than it was before the War in 1913 and 1914. Thus it will be seen that Russia really requires all the wheat she is now producing for the use of her own people. Russia, therefore, should not be, on the average, a serious competitor in world wheat markets.

OCCASIONAL WIFE

By
KONA ROBB WEBSTER
Author of "Joretta", "Lipstick
Girl" Etc.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla, the adopted daughter of a wealthy family. She is not to inherit money when she comes of age, but is studying commercial art in the hope of landing an agency job. Others in the story are Avis Worth, another wealthy girl who is trying to win Peter. Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. After a party at an exclusive club, when the rest of the members of the party go to a cabaret to continue the party, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel. After Camilla has gone from the studio, Avis Worth calls and persuades Peter to accept a loan of \$1,000. Peter fishes his exhibit and asks Avis and Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth," and Avis "Inspiration." Peter adopts the latter title and Camilla, heartbroken, goes to Peter's studio for quiet and to think. Peter and Avis follow later, and as the lights are turned on, the statue has been shattered to pieces. Avis accuses Camilla of doing this, and Camilla, stunned by the accusation and hurt and horrified by the accusation, flees.

At Camilla's suggestion, Peter enters as his exhibit a statue he has sculptured especially for her as a wedding gift. They named it "Land of Hope." Camilla's advertising campaign and Tiny Tots broadcast was a great success, and Mr. Hoyt expressed his pleasure and surprise on learning that Camilla was the author and artist who was so ably stimulating business for his company.

Peter's exhibit was awarded the Paris scholarship, and he prepares for his journey to France. After the ship's departure from New York, he is on his way to his cabin when he meets Avis Worth. During the voyage Avis tells Peter that Camilla smashed his scholarship exhibit in a fit of temper, and he believes her. Meanwhile in New York Gus Matson calls on Camilla and confesses it was he who destroyed Peter's model.

(Now Go On With The Story)

CHAPTER LX

A peremptory summons from Mr. Hoyt on the day after Gus Matson's visit, took Camilla to his office in a state of trepidation. Had something unusual happened? Was he angry with her for her presumption and deception? Had his pleasant attitude at the broadcasting station been only a masked act, for the sake of his pride? It would be like him, perhaps.

She approached the inner office almost with a feeling that the man whom she was about to meet was a stranger to her. But his greeting was cordial enough—even affectionate. Her fears vanished.

"I've been wanting to talk to you my dear. You gave me the surprise of my life the other day."

"Was it very wrong of me to deceive you, dad?" she appealed wistfully.

His eyes twinkled as she never had seen them before. "I'm mighty glad you did. You proved to me what I always suspected that you could do. Even when your mother opposed your ambition to take up commercial art, I held a secret conviction that you could make good. With your determination, I could see that any encouragement from me would be superfluous, and only antagonize your mother's move." He exchanged with her that look which she remembered so well from her childhood, a glance of understanding which made words useless.

"Nothing could have pleased me more than the way you have developed. I will admit that I never should have dreamed of placing my business promotion into your inexperienced hands, much as I believed in you. So I engaged efficiency experts and paid a large fee to an advertising agency to handle the campaign. And after all, it fell right into your inexperienced hands, and you pulled us to victory. It only goes to show that the wisest of us haven't so much judgment, altogether, no matter how big we think we are. Well—that is just a little bit of life's irony."

"It would be worse than irony if I hadn't made good," she reminded him with a timid smile.

"But you didn't," he dismissed the matter with a wave of his hand, and demanded abruptly, "But what about Peter? Are you going to let your marriage fall, now that you have succeeded in your career?"

"Oh, no," Camilla denied. "You know why I did not go abroad with Peter. We are living according to our original contract, of course."

"What good will your contract be a year from now?"

"Why—Peter loves me, dad?"

"I don't doubt it. I know he does. But when people love each other and are married, they should be together; at least, for most of the time I tell you, Camilla, I feel it my duty to point you from a man's standpoint. Your place is with Peter in Paris, or wherever he is."

"But he can't take care of me and he won't accept my help. He is terribly proud."

"Of course. But what about Avis Worth?" he released another bomb. "Do you know that she is on the same boat with Peter?"

"Yes, but—"

"That is no coincidence," he interrupted, sternly. "Camilla, I may as well confess that I've kept a pretty close watch over your private affairs since you left us. Your happiness is my deepest concern. I did not like your marriage plans when I first learned about them, and this separation has made them preposterous. I told you I won't stand by and see your life ruined. It will be, if you lose Peter. I know what he means to you—you may not think so, but his love lowered and he seemed to be projected for a moment into a distant past, but I, too, know what love can mean. But you will lose Peter if you permit this thing to go on—at least, you will lose the Peter and the love with which you began so confidently."

"Oh, I do wish so much to be with Peter," she confessed. "But he won't have me under the circumstances."

"If there any objection to your living apart in Paris, and seeing each other often, as you did here?"

"I suppose not. But I can't leave my work and live there on nothing."

"Listen to me, my dear. If necessary, there always could be someone found to fill your place in your work, but not in Peter's life. And that is not even necessary. It will be a simple matter to find someone to take over your radio programs, even someone whose voice so resembles yours that the public never would recognize a substitute, if that is your only visible. You have started the programs personally. Now, there is no reason why you can't pack up the rest of your work and take it right over to Paris with you. That will solve the problem of present existence. You can provide for yourself very well, but I also make the requirement that you and Peter are to take a comfortable studio, large enough to accommodate the work and privacy and temperaments of two geniuses," he smiled slyly, "and live together. You will discover what happiness is, then."

FALSE TEETH

Dr. WERNER'S POWDER

Dr. Werner's Powder holds false teeth so firmly and comfortably in place for 24 hours they actually feel natural—eat, laugh, sing without fear of any slipping. Prescribed by world's most eminent dentists—they know it's the best—just sprinkle on. Inexpensive—any drugstore.

"But Peter won't live that way when I have the advantage over him. He hasn't even a start in Paris yet."

"As for Peter, I have managed some other things which may mollify his wounded pride," Hoyt continued placidly. "I have arranged for a large replica of his exhibit group to be given a prominent place in this city, but he never will know who promoted the movement. You will guard the secret for his sake. It is not philanthropy—I was only given the hand of destiny for starting the movement."

"As for your future, my dear child, you are my sole heir to the fortune which you have salvaged. However, that is not a new idea. I always expected to be the bulk of my estate to you, but I purposely insisted when your mother took you that I should not acknowledge you as an heir, so that you would be forced to prove yourself. I had confidence that you would, which increased as you grew older. That you accomplished it through your own efforts to reclaim my business, is another one of those inexplicable twists of fate. But I advise you, if you warned her with twinkling eyes, 'that you had better not tell your proud Peter you are an heiress. Let him be surprised when the time comes, and he has made good for himself.'"

The tears were falling, unheeded, down Camilla's face, while he talked; and when she left, a more perfect bond of paternal affection and daughterly respect was not to be found anywhere. Camilla Hoyt had entered into her rightful heritage, by character and effort!

The pandemonium of a steamer landing at Cherbourg was in full swing. Passengers who had been waiting with varying degrees of waning patience to land, were released in a single file down the gangplank. Peter followed Avis, who turned to him often with a smile or a word of confidence.

"Have you got anything?" she asked him, with the air of an habitual traveler prompting her charge. "Guess so," his reply was laconic. But he felt as if he had left something very valuable aboard the steamship, something which he could not go back to recover. It was not that it had been afterwards into the void of lost ideals and illusions. He felt older, hurt, broken; but he faced the new future resolutely.

Following Avis with eyes that were almost unseeing; he jostled against her as she stopped abruptly in front of him in her destination. He looked up, inquiringly, to follow her eyes which were riveted upon something she saw on the pier. His own eyes stared as if he were seeing a mirage.

Surely, it could not be true. That couldn't be Camilla standing down there, waving at him, her deep black eyes so prominent in the little white face. But it was! His heart leaped and pounded. All the old emotion, the ecstatic rapture of the springtime, surged back into his empty being and filled him with remorse. How could he ever have doubted her? Even from here, he could look into her shining eyes and know that she never could have betrayed him as

Avis had said she did. His smile leaped down to meet hers, and his hand waved wildly. He almost trampled over Avis in his eagerness to reach her, oblivious of everything else in the world. They clung to each other desperately. Ten days had been an eternity of separation.

"But how—?" he wondered, when he could speak.

"I arrived yesterday. I flew to New York, and came on the fastest boat that sails the seven seas," breathlessly, "but I'll tell you all about it, later. Let me see you through the customs, first."

"Darling, are you real?" he squeezed her arm.

"Real enough to remember the French I need right now."

"Then you are—you!" he admitted with delight.

Avis was so shocked and bewildered that all she wanted to do was escape. Neither of those united lovers had even remembered her existence. She hurried away to lose herself in the weaving throngs. "Well, that is—that," she observed wryly to herself. "You can stir a man's emotions, but you can't make him love you like that!"

—THE END—

Did Not Always Pay

Skyscrapers Have Often Proved To Be Costly Publicity

Raymond Hood's dead airs discussion of architecture function and architecture decorative, of the skyscraper stark and the skyscraper softened down. There remains the bigger question of what future awaits the skyscraper in any form. How many years will it be before the builders set out once more to out-top their neighbors' towers? Or has an era which began about twenty-five years ago with the Singer Tower and the Woolworth Building come to an end with the Empire State and Rockefeller Center? The death wish in a short time of Cass Gilbert and Raymond Hood may be symbolic.

Even before the great crash and the great depression the skyscraper was under suspicion from the standpoint of sound economics. It did not always pay for itself as a real estate enterprise. A large part of the return was supposed to be in advertising. But for that purpose a skyscraper had to be more than tall. It must be taller or tallest. People were not erecting high buildings but higher buildings, primarily for the world to look at and talk about and only subsequently for people to dwell in. The economic collapse has turned this into very costly publicity.—New York Times.

Little Helps For This Week

"He that abideth in me and I in him bringeth forth much fruit." John 15:5.

"Let the beauty of the Lord our God be upon us." Psalm 90:17.

As some rare perfume in a vase of clay

Fervent with a fragrance not its own,

So, when Thou dwellest in a mortal soul,

All heaven's own sweetness seems about it shewn.

Some glances of real beauty may be seen in their faces who dwell in true meekness. There is a harmony in the sound of that voice which Divine love gives utterance, and some appearance of right order in their temper and conduct whose passions are regulated.—John Woolman.

I believe that no Divine truth can dwell in any heart without an external testimony in manner, bearing, and appearance, that must reach the witness in the heart of the beholder and bear an unmistakable, though silent, evidence to the eternal principle from which it emanates.

Canadian Composers

Need Of A Dominion-Wide Organization Is Stressed

The need of a Dominion-wide organized movement to found a Canadian performing right society for the benefit of Canadian composers was put forward at Toronto by John M. Elsom at the dinner of the Canadian College of Organists. The college was urged to give its support to an effort which is to be made to found such an organization.

I WAS A
SLAVE TO
HOUSE-CLEAN-
ING CHORES

UNTIL I USED

It gets rid of dirt easily and quickly, no hard rubbing and scrubbing...

UNPLEASANT cleaning jobs are easy when you use Gillett's Pure Flake Lye. It actually washes the dirt away. Gets right down to ground-in grime! Use a solution of 1 teaspoonful dissolved in a quart of cold water. Off comes the dirt! And you do no hard rubbing!

Keep Gillett's Lye on hand for all your cleaning. Use it for toilet bowls. To clear stop-drains. It kills germs, destroys odors—and never harms enamel or plumbing. Your grocer sells Gillett's Lye. Ask him for a tin—today. *Never dissolve lye in hot water. The action of the lye itself lessens the water.

FREE BOOKLET!—Get your copy of the new edition of the Gillett's Lye Booklet—it tells you dozens of ways to make house cleaning easier by using this powerful cleanser and disinfectant. Also contains full information for soap making, thorough cleaning and other uses on the farm. Address: Standard Brands Limited, Fraser Avenue & Liberty Street, Toronto, Ontario.

LYE
EATS DIRT

Since the Civil War, only three United States presidents have been Democrats.

Between 1300 and 1400 A.D. bubonic plague killed one-fourth of Europe's population.

IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED
Wake up your Liver Role

No Colossal necessary For you to feel healthy and happy, you must give your liver a good workout. Your liver is the most important organ in your body. It filters out all the poisons from your blood. If it is weak, you will feel tired, nervous, and generally unwell. To keep your liver healthy, you must give it a good workout. Use Dr. Williams' Pink Pills for Pale People. They will give your liver the strength it needs to do its job. You will feel better, and your health will improve.

Law of Supply and Demand.

"The law of supply and demand governs prices." How often have we heard this statement? Ever since we can remember, says a writer in *The Grand Prairie Tribune*, and continues: "Time was when this law did more or less hold good in all lines. But in these days of controlled factory production the only place where this is true is in the case of the primary producers—farmers and labor. If there is too much wheat or any other commodity grown on the farm, then down goes the price. If there is a surplus of labor, except where there are very strong unions, down go wages."

"For the past four years the purchasing power of the public has steadily declined, yet commodity prices have not come down. If they have, it has not been in any equal proportion to wages paid or to farm produce prices. Retailers are not responsible for this condition, as they have to buy in a controlled market. It is well known that in some cases commodities have actually risen during the depression."

"The farmer has to pay even more for his machinery than he did when he was getting over a dollar a bushel for his wheat. In this we are not blaming the agents. They too, have to deal in a stabilized market."

"What is the function of the Senate? Is a question which we have all been called upon to answer when going to school. We can all reach the answer 'It prevents hasty legislation.' And a lot of us have been repeating this answer parrot-like ever since. However, there is a proportion of our society which thinks differently today. In the same parrot-like fashion we have been repeating 'Supply and demand govern prices.' Which is just about as erroneous as the Senate one."

Conditions have changed since the old theories about supply and demand were enunciated. This phrase, so far as manufactured articles are concerned, does not hold good today. Either primary producers' prices must come up or else controlled commodity prices must come down, if society is to carry on. Conditions cannot continue as they are."

U.F.A. Convention.

Arrangements are about completed for the holding of the annual U.F.A. Convention of Stony Plain Constituency. It has been decided Magnolia will be the meeting place. Our member, Mr. Donald MacLeod will be present, and, possibly, Premier Reid. A number of delegates from this district will be present.

Equine Takes It on the Lam.

It being still the open season for runaways, a horse belonging to Mrs. Saisman took advantage of it on Saturday afternoon to break away from the rack in the north end of town and head for the well-filled corn crib at home. The animal had become frightened from the noise made by a bunch of snarling mongrels. While the horse and buggy were perambulating south on Petticoat lane the vehicle bumped into an obstruction and turned turtle. Striking another bump further along, it righted itself. On turning the corner to the feed lot along side the Hardwick Departmental Store, a front wheel caught a telephone pole, the shock causing the buggy to part company with the horse. At this point the horse was captured, and shortly after the owner arrived.

UNITED GRAIN GROWERS LIMITED

A DIVIDEND at the rate of four per cent has been declared on the paid-up capital stock of United Growers Limited, for the financial year ending July 31st, 1934.

Cheques will be mailed on September 15, 1934 to shareholders of record at the close of business, July 31st.

THE CROP TESTING PLAN —1934 SEASON RESULTS

The 4th year of the Crop Testing Plan in Western Canada has just concluded its operations for the summer season. This plan, which started in a very modest way with 1 Line Elevator Co. in cooperation with Dominion Dept. of Agriculture has now taken in 5 companies in cooperation also with western universities and Dominion and Prov. Depts. of Agriculture, the entire work now being co-ordinated by the National Advisory Committee on Agricultural Services.

This Plan, as has frequently been explained, involves the selecting of samples of wheat from farmers' wagons at country elevators and the growing of said samples at Experimental stations, Universities and at selected points throughout the country. As maturity approaches, these plots are carefully examined by experts who determine the purity as to variety of the samples, and classify the material into three groups on the basis of its suitability for seedling purposes. These groups are designated A, B, C—A representing what is pure as to variety; B, reasonably pure; C is so badly mixed that it is not to be used as seed.

During the inspection of the plots, a Field Day is held, when farmers and elevator men may see these experts who will explain differences in varieties and show advantage to a farmer of using only best seed.

During the past month there have been checked up 15000 wheat samples secured from farmers at 600 points. This work was done at 50 "District Plots."

These Plots were classified: A, 23 per cent; B, 30; C, 41.

Practically every one of the Elevator districts from which these samples were secured has farmers growing excellent stock, but this was not very widely known. In many cases the farmer himself was not aware of its good quality.

Another discovery was, a large percentage of A lots were traced back to registered seed.

The Crop Testing Plan is the result of the vision of Mr. A. L. Searle, Pres. Searle Grain Co., who, in 1929, considered that those who handled farmers' products could assist in the improvement of the quality of these products, hence in the enhancement of the farmers' income.

More for Barley than Wheat.

At Wetaskiwin, on Saturday, P. Palechek, a farmer who has been holding his barley since it was 25c per bu., was enticed by a jump in price to sell 3500 bu. The barley, special malting, brought around 67c per 48-lb. bu. The price for No. 1 Northern wheat was 65c per 60-lb. bu. On a poundage basis this would give \$1.37 per hundred weight of barley against \$1.08 per cwt. of wheat. The barley sale brought \$2340.

U.G.G. Has Good Year.

Announcement is made by United Grain Growers Limited of the payment of a dividend of four per cent, or one dollar per share on the paid up capital of United Grain Growers Limited for the fiscal year ending July 31st. In announcing the dividend Mr. R. S. Law, President of the company, stated that payment is made from the earnings of the company after making provision for bond interest and full depreciation, and a satisfactory addition to surplus account. Attention was called to the fact that the shareholders have received, during the life of the Company, by way of dividends, an amount greatly in excess of the paid up capital of United Grain Growers. Cheques for the dividend just declared are to be mailed to shareholders Sept. 15th.

AUSTRALIAN WHEAT SITUATION

(Average Annual Wheat Production 180 Million Bushels)
Australia produces three important crops—Wheat, Mutton and Wool. Since the depression started much acreage formerly in grass and native pasture devoted to the production of mutton and wool was turned to wheat-raising for the reason that the price of mutton and wool fell relatively lower than the price of wheat. Australia refused to withhold either her mutton or wool from the market. She pressed these products for sale last year the price of wool has made a remarkable recovery. This will certainly tend to induce Australian farmers to take some acreage out of wheat and to devote it again to the more profitable business of sheep raising.
